

## FACTS & DIMENSIONS

length: 0.72m  
width: 0.50m  
height: 0.44m  
volume: 0.17m<sup>3</sup>  
weight: 17kg

length: 1.10m  
width: 1.04m  
height: 2.10m  
volume: 1.14 m<sup>3</sup>  
weight: 17kg

### outer material:

- hardly flammable (B1 fire resistance category, according to DIN 4102-1)
- waterproof surface

### for wind & blizzards:

- ropes and tent pegs anchor the inflated toilet into the ground

## SCOPE OF DELIVERY

- 1x easyToilet pneumatic tent with all-terrain composite
- 1x floor dry toilet
- 1x double action handpump
- 1x aluminum toilet stand
- 1x hand sanitizer gel with snap link
- 5x waste bag with airtight lid and chemical binder
- 8x tent pegs
- 4x ropes

## UNIQUE SELLING PROPOSITIONS:

- Privacy & relief at the emergency location for rescue forces and civilians
- One minute build up thanks to 1-Point-Inflation-System
- Pneumatic design facilitates compact volume of 0,17 m<sup>3</sup> and weight of 17kg in transport mode, making easyToilet the only complete toilet system that can be carried by a single person
- Fire resistance category B1 (DIN 4102-1) certified material
- With a waterproof outer fabric and loops for ropes with tent pegs easyToi can withstand harsh weather and reflected firehose water
- Rainproof nets maintain air hygiene through constant ventilation
- Spacious interior with enough storage even with heavy fire equipment
- Unique waste bags with an airtight lid offer superior hygiene and prevent smell build up due to their disposable nature
- All-Terrain composite floor is suitable for all emergency- and rescue locations

The irreplaceable companion for firefighting and rescue missions

### Until now:

Rescue and fire operations often go on for hours on end but there are no restrooms to be found at the emergency's location. Alternative sanitary facilities are often too remote to be used in a crisis situation, so the need to relieve oneself has to be suppressed for extended periods of time, or met around the next bush or corner. This is an additional inhumane strain on emergency forces and civilians alike, which amplifies stress and damages morale.

### The innovative solution for sanitary needs on the site of rescue and firefighting operations:

The portable pneumatic blow-up-toilet 'easyToilet' offers a pragmatic all-round solution to facilitate basic sanitary infrastructure on rescue and firefighting sites. Thanks to our 1-Point-Inflation-System easyToi can be set up within a single minute. Furthermore, in box mode with a weight of 17kg and volume of 0.17m<sup>3</sup>, the pneumatic WC can be manually carried by a single person, thus making it suitable for even the most inaccessible locations.

The lightweight pneumatic skeleton consisting of double layered tubes acts as a tent-like canopy supporting the spacious interior which allows for a comfortable use, even in heavy protective gear. When time is of the essence equipment pieces like gloves or gas masks can be stored in the toilet's interior side pockets. easyToilet's untransparent outer fabric in combination with its lockable zip door creates a comfortable area of privacy even at a busy rescue mission site. Our all-terrain composite floor consists of light aluminium plates coated in robust truck tarpaulin, making it suitable for all emergency locations. The outer material protects the user from fire, rain and spray water from fire hoses and keeps the interior safe and dry even in the harshest environmental conditions. Our synthetic fibre is classified as a B1 fire resistance category material, according to DIN 4102-1.

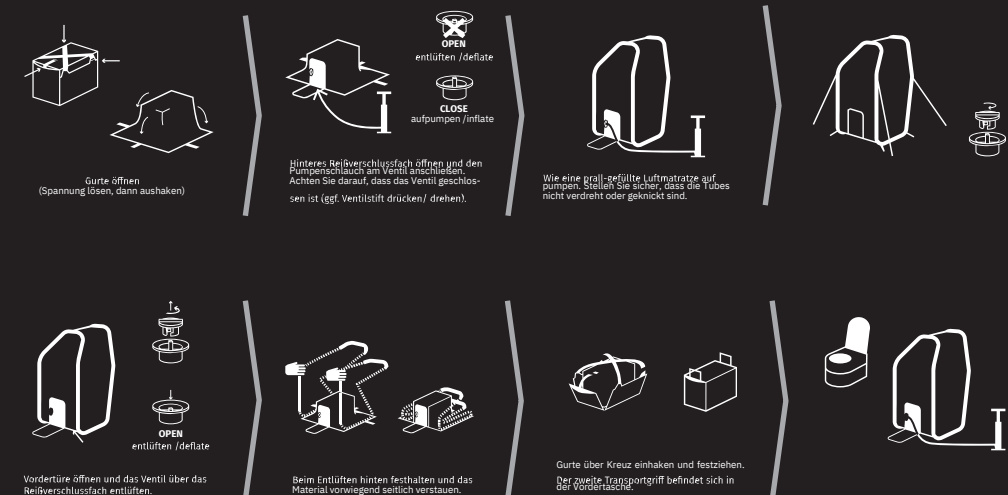

The unique waste bags with an airtight lid offer superior hygiene and their disposable nature prevents smell build up in the cabin. These containers act as hygienically insertable linings for the toilet bowl, providing each user with a clean, new and individual WC. Furthermore, this system allows for a minimum of undesirable cleaning work, as does easyToilets's low-maintenance and water resilient floor.

Firmly stitched-on loops on the toilet's exterior allow for easyToi to be anchored to the ground with the Storm Kit. These ropes and tent pegs keep the inflated easyToi fixed so it can be safely used even during stormy weather and blizzards.

The lightweight, efficient and safe design make easyToilet the only manually portable all-round temporary sanitation facility that is perfectly suitable for firefighting, rescue and other emergency missions.
